

Project Title: KinKin

Authors

- Isita Bagayatkar (014212380)
- Thi Bui (013716313)
- Joshua Lawson (014413464)
- Christina Ng (013960609)
- Eunice Oh (014311076)
- Isabella Piziali (012574289)
- Charlotte Zhuang (013977431)

Preface

- The expected readership of this sprint documentation are the stakeholders, including the students, teaching assistant (TA), and professor.

Daily Scrum

Meeting 1

Apr 11, 2022

Start time: 7:00 pm

End time: 7:45 pm

Meeting location: Zoom

Performance Review:

Charlotte:

- No updates

Christina:

- No updates

Eunice:

- No updates

Isita:

- No updates

Thi:

- No updates

Meeting Summary:

- setup backlog

- planned sprint
- assigned tasks
- planned future scrum meetings

Meeting 2

Apr 12, 2022

Start time: 8:30 pm

End time: 9:00 pm

Meeting location: Zoom

Performance Review:

Charlotte:

- No updates, review PRs later today

Eunice:

- Created sprint backlog & trello board for progress tracking, read documentation for messaging
- Continue on message SDK

Isita:

- No updates, revisit user creation
- Merge user in before other functionalities

Thi:

- Found resources for embedding youtube videos into workout program
- Plan to debug user creation & create test program for video embedding

Christina:

- No updates for today
- Blocked on user creation, outline PT search approaches

Isabella:

- Sorted out node modules
- Start working on the front end for PT's list of clients

Reminders:

- Review the user form
- Focus on unit tests
- For PRs, when you create a new one, please request everyone to review

Meeting 3

Apr 13, 2022

Start time: 8:30 pm

End time: 8:54 pm

Meeting location: Zoom

Performance Review:

Charlotte

1. reviewed the PRs on github
2. merged login

3. will work on front end now

Eunice

1. mapping out workflow for new vs existing users
2. reading documentation

Isita

1. will review PRs
2. and yesterday's tasks: user creation functionality with thi

Thi

1. reviewed a PR
2. debugging user creation
3. testing video embedding

Christina

1. outlined PT search process
2. have questions for istia about the user schema
3. blocked by user stuff
4. will work on frontend search pages first

isabella

1. looking at the repo
2. is there a page for PT accepting and rejecting requests?
 - a. maybe create a dropdown on the PT dashboard page or a separate page
3. will work on frontend for client/pt requests first

Josh

1. reviewing backlog
2. will work on front end items

Parking Lot

1. how are requests and messages started between clients and PTs?

Meeting 4

Apr 14, 2022

Start time: 7:39 pm

End time: 8:00 pm

Meeting location: Zoom

Performance Review:

Thi

1. Update: No updates
2. Next task: continue debugging user creation and test video embedding

Isabella

1. Update: Started frontend for requests
2. Next task: Continue frontend for requests
3. Future: Backend of requests

Eunice

1. Update: Implementing chat SDK and frontend
2. Next task: Pass in user IDs to chat SDK

3. Impediments: Need user profiles to initiate messaging

Charlotte

1. Update: No updates
2. Next task: Work on workout program frontend

Christina

1. Update: Reviewed user backend PR
2. Next task: Work on frontend for PT search

Parking Lot

1. how does searching by location work? are we doing this? by distance?
 - a. we can use geospatial data, a feature of mongo
 - b. we can request current location
 - c. search parameters
 - i. language
 - ii. location
 - iii. availability
 - iv. price rate
 - v. speciality
2. user profiles in marketplace vs user profiles from their point of view

Meeting 5

Apr 15, 2022

Start time: 5:30 pm

End time: 5:45 pm

Meeting location: Discord chat

Performance Review:

Eunice:

- no updates
- will cont. working on next tasks mentioned yesterday

Christina:

- No updates
- Will continue to work on frontend for PT search

Charlotte

- No updates

Isabella

- No updates

Meeting 6

Apr 18, 2022

Start time: 8:30 pm

End time: 9:11 pm

Meeting location: Zoom

Performance Review:

Charlotte

1. updated auth on backend-workout branch
 - a. add JWT verify function to server/util/auth.js
 - b. added verification to workout endpoints
 - c. changed some of the functionality to only look at data that matches the PT's id
2. added userId attribute to User schema on backend-workout branch
3. I'm not sure if the workout endpoints are working with real users
4. blockers:
 - a. user creation

Josh

1. updates
 - a. made branch - ready to merge
 - i. 2 pages w/ reusable elements
 1. form for when user is submitting new data - preferences etc.
 2. also updating preferences whenever
 - ii. 2 checkboxes - client & PT
 - b. did a bunch of PR reviews
2. next:
 - a. continue fleshing out PT/user signup flow in contact w/ backend
 - b. also work on other assigned frontend work
 - c. share Google project w/ everyone
3. blockers:
 - a. none

Eunice

1. updates
 - a. basic chat api for merged
 - b. can conti. working on chat or more pressing backend stuff
 - c. also tried to test react components
 - d. able to use test users → not only .sjsu emails
2. next:
 - a. **send links for react testing**
 - b. ask josh if he's working on PT creation frontend
3. blockers
 - a. Need user profiles to initiate messaging

Isabella:

1. updates:
 - a. worked on frontend for training requests
 - b. worked on routing flow if user is signed in or not
 - c. worked on login button
 - d. styles stuff for home page
2. next:
 - a. convert page for training request to modal components
 - b. start backend for training requests

3. blockers:
 - a. hopefully not anymore since marketplace got merged

Isita:

1. updates:
 - a. debugging user creation backend - not sure why object gets created as expected
2. next:
 - a. hit up thi for help
3. blockers:
 - a. none

Christina:

1. updates:
 - a. push changes to marketplace to PR - ready for review
 - b. reviewed eunice's chat API PR
 - c. worked on frontend for PT search
2. next:
 - a. planning to work on backend for PT search
3. blockers:
 - a. don't think so

Parking Lot:

- Isabella: Login: login should disappear once signed in
 - just need to wrap in curly braces, ask for user.token
- Eunice: what to work on
 - kind of behind for frontend for workouts, maybe Charlotte will be able to handle
 - **PT creation backend creation endpoint**
 - change to city & state
 - figure out some geo API, and use whatever format they use
 - if we want to include search based on location
 - location is a low priority, just be aware
 - did outline how we could do location based on distance
 - can use geo.json, use as point, specify coordinates
 - can use near function to specify distance

Meeting 7

Apr 19, 2022

Start time: 6:30 pm

End time: 7:15 pm

Meeting location: Zoom

Performance Review:

Joshua:

1. Updates: Updated pages to include checkboxes for whether PT or client
2. Next: Nothing to review in repo
3. Blockers: Not sure of format for db to post

Charlotte:

4. Updates: No updates, contemplated schema
5. Next: Work on backend workout / merge backend workout
6. Blockers: User creation

Isabella:

7. Updates: Worked on frontend of requests, updated branch
8. Next: Blocked
9. Blockers: User creation, user dashboard page doesn't exist

Eunice:

10. Updates: Reviewed Christina's marketplace PR
11. Next: Work on PT endpoint creation
12. Blockers: Messaging - user profile frontend

Thi:

13. Updates: Working on frontend
14. Next: Get started on user creation
15. Blockers: workout frontend

Christina:

16. Updates: No updates
17. Next: Continue marketplace PT search
18. Blockers: After logging in, not working right. Preventing from being able to complete work, fixed during meeting

Isita:

19. Updates: None
20. Next: Get help from Thi and Charlotte to get backend user creation working
21. Blockers:

- Thi and Charlotte can work on user creation to help prevent it from further blocking people

Parking Lot

- Where should training requests modal go?
 - PT dashboard?
- isabella branch- delete env files and re-push, in future pushes do not include env files
- Eunice: same error, not able to log in with google- error due to cookies potentially

Meeting 8

Apr 20, 2022

Start time: 8:15 pm

End time: 8:45 pm

Meeting location: Zoom

Performance Review:

Summary of Member's Performance:

What did I do today that helped the team meet the Sprint goal?

What will I do tomorrow to help the team meet the Sprint goal?

Do I see any impediment that prevents me or the team from meeting the Sprint goal?

Joshua:

- 22. Updates: ProvideUserInfo page takes user info in and stores it in local state, modified app js flow
- 23. Next: work on creating user page for client and PT, change user profile settings
- 24. Blockers: location for new pages

Charlotte:

- 25. Updates: Merged several items that covered backend, user PT client profile all with endpoints, CRUD operations. Isabella branch navbar, frontend refactor
- 26. Next: create cookies (stay signed in)
- 27. Blockers: no blockers

Isabella:

- 28. Updates: Working on understanding backend, start implementing request backend
- 29. Next: implement request backend
- 30. Blockers: no blockers

Eunice:

- 31. Updates: Discussed with isabella the request flow on the backend
- 32. Next: implement request flow on backend
- 33. Blockers: Don't have any right now

Thi:

- 34. Updates: review the user backend
- 35. Next: Keep working on front end for user pages
- 36. Blockers: front end pages

Christina:

- 37. Updates: finished the PT search front end
- 38. Next: Ask Charlotte about PT search back end, hopefully finish tonight
- 39. Blockers: figuring out how to connect the front end to the backend

Sprint Review

Apr 21, 2022

Start time: 8:12 pm

End time: 8:30 pm

Meeting location: Zoom

Performance Review:

Backlog updates:

Completed:

- frontend
 - most of marketplace
 - frontend routing and navigation
 - chat
- Backend
 - training request
 - workout program (integrated with user)
 - endpoints for database
 - search for PTs by filter
 - new user logic
 - updating user information from google
- Authentication
 - login and logout
 - JSON web tokens
 - session tracking

Not completed:

- marketplace locations on the frontend
- Training request for PT (backend)
 - Blocked on user creation
- Frontend for workout program
- creating user, PT, and client profile
 - almost complete, needs to be updated with new schema

Performance Review:

What went well:

- PR reviewing process was efficient
- Distributing tasks
- Good updates in meetings

What can be improved:

- Identifying and prioritizing items that need are dependencies
 - lots of tasks being blocked by backend work
 - confusion between frontend and backend development

- Prepare visual presentation of backlog items (using Trello)
- Estimate time and workload for tasks
- Assign test cases
 - lacking in robust testing
